PROFESSIONAL SUMMARY

Data Engineer with 3 years of Deloitte Consulting experience delivering Azure data platforms and BI solutions for Hong Kong clients. Skilled in Python, SQL, PySpark, Azure Data Factory, Databricks, and Power BI, with experience across the full project lifecycle—from requirements and development to testing, deployment, and production support.

PROFESSIONAL EXPERIENCE

Data Engineer
Deloitte Consulting (Guangzhou) Limited NOV 2022 - JAN 2025
Clients served: HKJC, Café de Coral, Hysan, FWD, Jebsen, PVH

1. Azure Data Platform, ETL & Data Engineering:

Contributed throughout the **full project lifecycle**, from requirements gathering and solution design to development, SIT/UAT, deployment, and production support. Built **20+ Azure Data Factory pipelines across 8+ sources**, using **Databricks, Python, dbt, and Synapse SQL** for ETL. Optimized **ADLS Gen2** architecture, implemented security and validation controls, and supported **GitHub/Azure DevOps CI/CD** across DEV, UAT, and PROD.

2. Business Intelligence & Data Visualization:

Contributed to developing 100+ Power BI report pages for Café de Coral covering dish-level sales, branch performance, and lunch and dinner sales analysis, with data validation and UAT support.

3. Data Transformation & Data Integration:

Migrated and modernized legacy SAS data-processing logic into **PySpark** on **Azure Databricks** while building customer segmentation datasets for insurance marketing.

Performed ETL transformations using Python *on* ***Azure Databricks*** for data cleaning and conversion, processing **50 GB of data daily**, and used **SQL** in a virtual machine environment for data validation and testing.

Developed **Python scripts** to extract and filter data from multiple **APIs**, standardizing file names, timestamps, and output formats; automated extraction workflows using **PowerShell scheduling** and deployed scripts in **Azure Databricks** to integrate API-based ingestion into broader **ETL workflows**.

International Work Experience | Canada FEB 2025 - JUL 2026
Professional experience in an English-speaking work environment, with cross-cultural collaboration and customer-facing experience.

EDUCATION

Bachelor of Science in Data Science & Big Data Technology SEP 2019 – JUN 2023

Guangdong University of Finance and Economics | *Canadian ECA Assessed – Equivalent to a Four-Year Bachelor's Degree*
Award: First Prize, Guangdong Division, China Undergraduate Mathematical Contest in Modeling (CUMCM), 2021

TECHNICAL SKILLS

Data Engineering & ETL: Python, PySpark, SQL, T-SQL, ETL/ELT, Data Pipelines, dbt
Business Intelligence: Power BI, Tableau
Data Platforms: Azure Data Factory, Databricks, Synapse Analytics, Data Lake Storage Gen2, Key Vault, DevOps
Data Architecture: Data Modeling, Medallion Architecture, Star Schema
Security & Integration: Azure RBAC, Application Registration, Client Secrets, Linked Services, Secure Service Connections
DevOps & Collaboration: Azure DevOps, GitHub, GitLab, CI/CD, Jira, Confluence, Lucidchart
Certification: Salesforce Platform Developer I
Languages: Cantonese (Native), Mandarin (Native), English (CELPIP 7)
